

# Interpretype Deaf-Blind Communication System

---

Deaf-Blind users enjoy unlimited access to wireline and wireless telephone communications, SMS texting, instant messaging, internet access, VRS and face-to-face conversations. Includes two ITY computers, Jaws Professional and one Focus 40 Blue. Interpretype Deaf-Blind Communication System (ITY DBCS 2.0) has incorporated a host of features to enable Deaf-Blind braille users the ability to communicate in a variety of situations. The ability for Deaf-Blind individuals to call or text message friends, family or colleagues, or communicate face-to-face with anyone anywhere, is now literally at their fingertips.

## Distance Communication

- ⤴ Users have the choice of using IP-Relay, SMS Text Messaging or Instant Messaging.
- ⤴ Once connected to the internet using the included WiFi or Ethernet connection, users can connect to anyone by simply selecting the "Phone" icon.

## Face-to-face Communication

- ⤴ Face-to-face conversations with a sighted person are easily accomplished by connecting wirelessly to the included companion ITY computer.
- ⤴ No internet connection is needed for face-to-face conversations. Just select the "Text" icon on the ITY computers and they will open the Conversation Display Window and connect to each other automatically using Bluetooth.

## Included in the Package

- ⤴ Two full featured laptop computers running Windows OS that easily fit in a single lunch box sized bag.
- ⤴ Pre-configured to communicate with each other and over the internet.
- ⤴ Jaws Professional screen reader software is pre-installed on one of the computers and paired with Freedom Scientific's Focus Blue 40 refreshable braille display.

## Additional Capabilities

- ⤴ Users can use take full advantage of other computing tasks such as emailing, internet browsing and adding other software to personalize the computer to their preferences.
